## PROFESSIONAL SUMMARY

Web Developer with a strong foundation in JavaScript, HTML, CSS, and backend development. Skilled in creating responsive, user-friendly designs using tools like Figma and frameworks like Vue.js and Angular. Adept at collaborating with cross-functional teams and solving complex problems through innovative solutions. Committed to delivering high-quality web experiences with a focus on performance and user satisfaction.

## EXPERIENCE

### Web Developer | Business Solutions

July 2023 - present

- Developed and maintained HTML templates, ensuring cross-browser compatibility and optimized responsiveness across different devices.
- Led the migration from Angular to Vue.js, significantly improving site performance and code maintainability.
- Implemented new CSS styles and integrated a user-friendly chat feature, enhancing customer interaction and user experience.
- Managed content updates and performed site maintenance using WordPress, ensuring timely and accurate content delivery.
- Developed and rigorously tested layouts to ensure mobile and tablet compatibility, focusing on user accessibility.
- Worked closely with design and marketing teams to implement web components, contributing to a cohesive and aligned project strategy.

### Personal Project: Hotel Platform

- Designed and developed a user-centric platform that allows clients to choose vacation destinations, ensuring a smooth user experience.
- Created low and high-fidelity prototypes using Figma to communicate design vision and gather feedback.
- Implemented dynamic JavaScript components, such as carousels, to enhance the site's interactivity.
- Developed an iframe-based sign-up solution distributed to users via email.
